

Timber Production

1. Using the web, compare the differences between softwood and hardwood timber:

Feature	Hardwood	Softwood
Type of Tree		
Growth Speed		
Grain Pattern		
Common Examples		
Typical Uses		
Cost		
Sustainability		

2. We're using timber for our lamp base. Do you think hardwood or softwood is the better choice?
Explain your reasoning why.

3. What is native forest logging?	4. What is plantation forestry?

5. What are the benefits of plantation forestry?

6. Why might native forest logging be seen as harmful?

7. Which method do you think is more sustainable?

8. What could be a downside of only using plantation-grown timber?

9. Watch the [video](#) on how timber is processed and place a number below to identify the correct order in which the timber is processed:

Step	Number/Order
Merchandiser infeed	
Sorted by species and length	
Species/size sorter	
Sawmill infeed	
Debarker	
Hewsaw	
Delivery	
Timber trimmed	
Planer infeed (Planer)	
Species analysis and cut to length	
Stacker	
Branding and wrapping	
Dry kiln
